## PROFESSIONAL SUMMARY

Product-focused technology professional with 1+ year of enterprise experience and end-to-end ownership of two independent Android products in Google Play closed testing. At TCS, independently built reporting automation that reduced preparation from approximately 30–60 minutes to 5 minutes per run (estimated 83–92%). Combines product requirements, prioritization, SQL/BI analysis, UX thinking and hands-on execution.

## PROFESSIONAL EXPERIENCE

### Assistant System Engineer | Tata Consultancy Services (TCS)

May 2024 – Aug 2025

Enterprise Technology Operations | Mumbai

- Identified a recurring manual reporting bottleneck and independently built an on-demand Linux shell-script workflow that consolidated server/database health data into stakeholder-ready HTML reports, cutting preparation time by an estimated 83–92% per run.
- Developed SQL extracts and Excel/Power BI reports for CPU and storage utilization, turning infrastructure metrics into actionable reporting for technical and business stakeholders.
- Investigated production incidents using logs and root-cause analysis; documented findings and supported coordinated maintenance and restoration in an SLA-driven environment.

## INDEPENDENT PRODUCT PROJECTS

### HomeyB | Product Lead & Android Developer

Sep 2025 – Present

Self-initiated hyperlocal social app | Google Play closed testing

- Owned MVP scope, PRD, user journeys, user stories and acceptance criteria for Nearby discovery, Interest Hives, local Highlights, connections and messaging; translated screen concepts into working Android flows.
- Developed with React Native, TypeScript, Firebase and H3 geolocation; prioritized approximate location, consent-based messaging, blocking/reporting and expiring content to balance utility, privacy and safety.
- Led device-level testing, issue investigation and Play Store release preparation, including location-verification behavior, permissions, onboarding and user-flow reliability.

### Parky | Independent Product Builder

Mar 2026 – Present

Self-initiated offline-first Android app | Google Play closed testing

- Defined, built and tested a parking-memory app with GPS capture and accuracy guidance, location notes/photos, compass navigation, local history and Android shortcuts using React Native and TypeScript.
- Prioritized explicit saving, local-only storage and offline guidance over background detection, cloud accounts and embedded maps to improve simplicity, privacy and operating-cost efficiency.

## CORE SKILLS

**Product & UX:** Product discovery, JTBD, MVP scoping, PRDs, prioritization, roadmaps, user stories, acceptance criteria, wireframing, prototyping, usability testing, UAT

**Analytics:** SQL, Power BI, DAX, Power Query, Excel, KPI/funnel metrics, A/B test design, Python (intermediate), root-cause analysis

**Technology & Delivery:** React Native, Expo, TypeScript, Firebase/Firestore, H3 geolocation, Git/GitHub, Linux/shell, Agile/Scrum, Jira (familiar), stakeholder communication

## EDUCATION

**Bachelor of Engineering, Information Technology** | Bharati Vidyapeeth College of Engineering, Navi Mumbai | 2019–2023

## CERTIFICATIONS & PROFESSIONAL LEARNING

IBM Product Manager Specialization; Advanced Business Analysis: Elicitation & Analysis; Customer Analytics (University of Pennsylvania); IBM Agile Development & Scrum; IBM Data Engineering; IBM Cloud Computing.
